

IT organizations are being challenged to assure that their projects are aligned with overall strategic goals and business objectives and deliver promised results on time and within budget. Although accustomed to measuring and managing technical performance, many IT organizations have a poor track record of measuring and managing non-technical performance.

Agitech's Value Proposition consists of:

- Single-Point Solutions – Our solutions address performance, scalability, reliability and availability issues.
- Proven Process Framework – Agitech utilizes a proprietary and mature process that helps structure problem resolution.
- Expertise with Multi-Platforms – Agitech has trouble-shooting experience in a range of diverse and complex systems.
- Short lead-time – We respond immediately to client requests on short notice.
- Cost Effectiveness – Agitech's leverages the time zone differences for providing quicker, reliable, lower cost solutions. Competitive vendors charge significantly more for this service.
